SKILLS

Agile Software Development & Management
Continuous Integration & Continuous Delivery (CI/CD)

Cross-functional Team Leadership

High-quality System Design

Key Performance Indicators

Proactive Product **Risk Management**

EDUCATION

Bachelor's of Science
Management Information Systems (MIS)

Miami University, Oxford OH

The MIS degree provides managerial and technical skills critical to directing and controlling the information resources of an organization.

Emphasis is on structuring and solving business problems by appropriately applying technological resources and information management skills.

WORK EXPERIENCE

Principal Owner

Atriumn Consulting

Aug 2021-present

- Advising startups on **high-quality continuous product delivery**, resulting in safe but aggressive go-to-market strategies.
- Designing systems with quality as a foundational principle, enabling clients to proactively embrace risk.

Head Of Engineering Quality & Productivity

Pinger

Sep 2021-present

- Achieving high-quality experiences for Pinger's 100 million customer and business platforms through **risk mitigation, productivity, and testing disciplines**.
- Managed CI/CD pipelines and associated tooling for engineering teams across three continents, allowing for rapid product iteration.
- Mentoring 100+ Product/Engineering staff and company leadership on proactive build practices, resulting in a **culture of stakeholder collaboration and building technical systems together**.

Head of Engineering Quality / Technology Practices Lead

Tempus Labs, Inc.

2017-2021

- Managed technology delivery practices for clinical diagnostic and analytical data products, **ensuring compliance, quality, and rapid delivery**.
- Partnered with Architecture Guild to improve platform direction, design, and procedures for testing, monitoring, and delivery, resulting in high-quality and compliant systems.
- Developed release management platform for 500+ production services, enabling rapid iteration while maintaining compliance.

Senior Director Of Engineering

Centro

2014-2017

- Fostered a culture of **shared product development across teams, stakeholders, and leadership**, resulting in customer-focused and collaborative product development.
- Regulated and tracked compliance to quality and delivery KPIs, resulting in high customer satisfaction and exceeding industry standards.
- Guided technical teams in **implementing test automation best practices**, resulting in faster build/deploy/release cycles.

Director Of Engineering Quality

Angi

2013-2014

- Spearheaded the **deployment of agile and quality processes** across two major Engineering offices, shifting to a rapid delivery model, bringing new features to customers in a highly competitive industry.
- Oversaw transition to trunk-based development processes, resulting in more frequent, high-quality product releases, delivering value to customers on a daily basis.
- Consolidated feature and project planning tools into a single platform, resulting in efficiency and traceability in daily Product and Engineering work.

Senior Engineering Manager, Quality Assurance

Groupon

2010-2013

- Guided 300+ engineers in product release validation and development productivity processes, resulting in a culture of high ownership and attention to detail.
- Collaborated with global leaders to implement holistic quality strategies, integrating end-to-end full-stack testing and 'last mile' responsibilities, **enabling a culture of sane but urgent product delivery**.
- Facilitated internal dogfooding of beta rollouts with employees and friendly users to gather real-world feedback on production systems.

WORK EXPERIENCE (CONTINUED)

Lead Consultant / North American Quality Practice Lead

Thoughtworks

2000-2010

- Led quality engineering capabilities for the company's North American Agile practice, resulting in consistency in deliverables, collaboration, and customer satisfaction.
- **Mitigated risks and reoccurrence of quality gaps** with company delivery engagements, resulting in shared responsibility for quality practices.
- Reduced cross-functional quality concerns by partnering with Compliance, Legal, and Staffing groups to **set up teams for success, accountability, and quality of deliverables.**
